

ELLS – Further Areas of Co-operation

1. Establish ELLS Graduate Schools
2. Enhance joint Research Programmes
3. More exchange of key data

Initiative for excellent universities (in Germany)

1. Graduate Schools (PhD education)
2. Clusters of Excellence (Research)
3. Elite University (No 1 and 2 approved)

Application of Hohenheim

Mission Statement

Building on outstanding scientists and co-workers, the University of Hohenheim is striving for excellence in research and teaching.

Of utmost importance is the contribution to the further development of knowledge in selected areas of the life sciences, such as biology, agriculture, nutrition and food technology, as well as the innovation- and service-orientated economics.

Additional emphasis in the scientific work is put on areas of high relevance for society and business in Baden-Württemberg, Europe and worldwide.

Situation of ELLS Universities

High School

Different situation all over Europe

Bachelor of Science

Situation depends very much on local conditions

Master of Science

ELLS offers education with european dimension

Graduate School

Very similar in Science Community

Post Doc

Different situations so far

Assumptions

1. Competition of Universities is increasing worldwide
2. Job markets are more and more orientated from local to european and global markets
3. Research to develop society and improve business is comparable and exchangeable

There is increasing demand for local and international competencies. Networks are suitable to offer higher education and research for these conditions

ELLS – Further Areas of Co-operation

1. Establish ELLS Graduate Schools
2. Enhance joint Research Programmes
3. More exchange of key data
